

<p><b>Installation guide LoRaWAN® Radio Module Supercom W2-L</b></p> <p>The retrofit radio module Supercom W2-L sends data from the mechanical water meter of the Elster series S110 PICOFLUX EF single-jet and M140 MODULMETER MOF for exchange multi-jet capsule directly and safely to your LoRaWAN network.</p> <p><b>Delivery Mode</b> Ex-factory, the radio module is in delivery mode (storage mode) and the function for date and time (wintertime) is activated. All further functions are deactivated until commissioning. In delivery mode, no readout by radio is possible.</p> <p><b>Indications</b></p> <ul style="list-style-type: none"> <li>▪ Sontex expressly points out that the data transmission via radio depends on the radio-technical propagation conditions at the place of installation. It is exclusively up to the installer/user to check the radio-technical propagation conditions at the intended place of installation.</li> <li>▪ Due to physical conditions, the transmission and reception ranges can strongly vary in buildings or be completely impossible.</li> <li>▪ Radiant heat and electric interference fields near the radio module Supercom W2-L have to be avoided.</li> <li>▪ The radio module Supercom W2-L has to be used according to its technical data.</li> <li>▪ The radio module Supercom W2-L can be mounted horizontally or vertically.</li> <li>▪ The reception properties can be impaired by: <ul style="list-style-type: none"> <li>- Harmonic interferences of remote controls</li> <li>- Blasting of the receivers by mobile radio antennas and mobile phones in the immediate vicinity</li> <li>- Sporadic interferences by emitters on flanking channels</li> <li>- Metallic obstacles that prevent the transmission of radio signals</li> </ul> </li> </ul> <p><b>Installation order</b></p> <ul style="list-style-type: none"> <li>▪ Remove the dummy cover from the water meter so that the recess planned for the radio module is freely accessible.</li> <li>▪ Remove any possible foreign objects from the recess.</li> <li>▪ Take the radio module out of the packaging.</li> <li>▪ Align the lower housing part of the radio module Supercom W2-L with the housing of the water meter.</li> <li>▪ Press the radio module Supercom W2-L firmly into the recess.</li> <li>▪ <b>Turn the transparent locking screw located in the middle of the module with <math>\frac{1}{4}</math> turn.</b></li> <li>▪ Secure the radio module against unauthorized removal with the black plastic seal.</li> <li>▪ Register the device (with DevEUI, AppEUI and AppKey) and activate it (start the JOIN process).</li> <li>▪ Check the radio function with a first readout.</li> </ul> <p><b>Commissioning</b> The scan guarantees a precise and correct detection of the forward and backward modulation indicator motion. The radio module Supercom W2-L is equipped with automatic magnetic manipulation detection. When the radio module is mounted onto the water meter, the contact of the manipulation detection is activated. In installation mode all functions are activated, and the radio module can be readout at any time.</p> <p><b>Switching in the operating mode</b> The switchover from storage to installation mode takes place when the radio module has registered at least 10 consecutive volume pulses (1l / pulse). At this moment, the join process (activation in LoRaWAN) is also started. If the join process fails, the LED blinks every 20 seconds. After switching to installation mode, the module sends a telegram every 2 minutes for 40 minutes (20x telegrams in total) and then switches to operating mode. From then on, the transmission times and intervals specified by the radio conditions (SF / ADR) apply.</p> <p><b>Parameterisation of the Radio Module Supercom W2-L</b> With the radio readout and parameterisation software Superprog, the following parameters can be programmed for commissioning:</p> <ul style="list-style-type: none"> <li>▪ Date and time.</li> <li>▪ Password</li></ul>

<p><b>Safety Instructions</b> The radio module left our works in a safety-related flawless condition. When operating this radio module and to keep this flawless condition, the user has to follow the installation instructions. Generally, a mounting position with increased humidity, heat accumulation and/or accumulation of cold has to be avoided. Increased heat or cold accumulation influences the durability of the battery. To protect the module against damage and dirt, the packaging should only be removed directly before installation.</p> <p><b>Complaints and Warranty</b> Complaints and warranty claims can only be made if the product has been used in accordance with its intended use and if the technical specification and all applicable technical regulations have been observed.</p> <p><b>Security with lithium batteries</b> 3V lithium battery is used. Certain security rules must be respected. During recycling, the following points must be respected: Do not recharge or short-circuit, protect against humidity, do not expose to heat, do not throw batteries in fire, keep out of reach of children.</p> <p><b>Advice on disposal</b>   In order to maintain and protect the environment, to reduce waste of natural resources and prevent pollution, the European Commission has established guidelines according to which manufacturers must take back electrical and electronic devices in order to forward them to a regulated disposal or recycling system. If you dispose of the batteries yourself, enquire about the possibilities of recycling in your region</p> <p><b>Technical Data</b></p> <table border="1"> <tbody> <tr> <td><b>General</b></td><td>MID: Q<sub>3</sub> 2.5 - 6.3 m<sup>3</sup>/h EWG: Q<sub>1</sub> 1.5 - 3.5m<sup>3</sup>/h</td></tr> <tr> <td>Permanent flow</td><td></td></tr> <tr> <td>Nominal flow</td><td></td></tr> <tr> <td>Pulse value</td><td>1 l/Imp</td></tr> <tr> <td>Operating temperature</td><td>5 ... 55°C</td></tr> <tr> <td>Storage temperature</td><td>-20 ... 70°C</td></tr> <tr> <td>Housing</td><td></td></tr> <tr> <td>Protection class</td><td>IP65</td></tr> <tr> <td>Compliance</td><td>according to RED 2014/53/EU</td></tr> <tr> <td><b>Radio</b></td><td></td></tr> <tr> <td>Method</td><td>LoRa®, bidirectional</td></tr> <tr> <td>Frequency</td><td>868 (863 MHz - 870 MHz)</td></tr> <tr> <td>Protocol</td><td>EN 13757-3 (M-Bus)</td></tr> <tr> <td>Cycles</td><td>Standard every 2 hrs</td></tr> <tr> <td>Range</td><td>approx. 30 m* (in buildings)</td></tr> </tbody> </table> <p>* Values depend on building-specific particularities and have to be examined if necessary. Zur Erhaltung dieses Zustands und zum Betreiben des Funkmoduls muss der Anwender die Hinweise beachten, die in der Installations-Anleitung enthalten sind. Vermeiden Sie generell eine Einbausituation mit einem überdurchschnittlichen Wärme- und/oder Kältestau. Ein überdurchschnittlicher Hitze- oder Kältestau beeinflusst die Lebensdauer der Batterie. Zum Schutz vor Beschädigung und Verschmutzung sollte das Modul erst unmittelbar vor dem Einbau aus der Verpackung genommen werden.</p> <p><b>Beanstandungen und Gewährleistung</b> Beanstandungen und Gewährleistungs-Ansprüche können nur geltend gemacht werden, wenn die Geräte bestimmungsgemäß verwendet wurden, sowie die technischen Vorgaben und geltenden technischen Regeln eingehalten wurden.</p> <p><b>Sicherheitshinweis Lithium-Batterien</b> Es wird eine 3-V-Lithiumbatterie verwendet. Sicherheitsregeln müssen eingehalten werden. Nicht wieder aufladen, nicht kurzschließen, vor Feuchtigkeit schützen, nicht erhitzen oder ins Feuer werfen, nicht öffnen, außer Reichweite von Kindern aufbewahren.</p> <p><b>Entsorgungshinweis</b>   Zu Erhaltung und Schutz der Umwelt, und um die Verschwendungen von natürlichen Ressourcen und die Umweltverschmutzung zu verringern, wurde von der europäischen Kommission eine Richtlinie erlassen, nach der elektrische und elektronische Geräte vom Hersteller zurückgenommen werden, um sie einer geordneten Entsorgung oder einer Wiederverwertung zuzuführen. Wenn die Entsorgung durch Sie erfolgt, erkundigen Sie sich über die Recyclingmöglichkeiten in Ihrer Region.</p> <p><b>Technischen Daten</b></p> <table border="1"> <tbody> <tr> <td><b>Allgemein</b></td> <td></td> </tr> <tr> <td>Dauerdurchfluss</td> <td>MID: Q<sub>3</sub> 2.5 - 6.3 m<sup>3</sup>/h EWG: Q<sub>1</sub> 1.5 - 3.5m<sup>3</sup>/h</td> </tr> <tr> <td>Nenndurchfluss</td> <td></td> </tr> <tr> <td>Impulsverigkeit</td> <td>1 l/Imp</td> </tr> <tr> <td>Betriebstemperatur</td> <td>5 ... 55°C</td> </tr> <tr> <td>Lagertemperatur</td> <td>-20 ... 70°C</td> </tr> <tr> <td><b>Gehäuse</b></td> <td></td> </tr> <tr> <td>Gehäuseschutzaart</td> <td>IP65</td> </tr> <tr> <td><b>Konformität</b></td> <td></td> </tr> <tr> <td>CE</td> <td>gemäss RED 2014/53/EU</td> </tr> <tr> <td><b>Funk</b></td> <td></td> </tr> <tr> <td>Verfahren</td> <td>LoRa®, bidirectional</td> </tr> <tr> <td>Frequenz</td> <td>868 (863 MHz - 870 MHz)</td> </tr> <tr> <td>Protokoll</td> <td>EN 13757-3 (M-Bus)</td> </tr> <tr> <td>Funkzyklen</td> <td>Standard alle 2 Std</td> </tr> <tr> <td>Reichweite</td> <td>ca. 30 m* (in Gebäuden)</td> </tr> </tbody> </table> <p>* Werte hängen von gebäudespezifischen Eigenheiten ab und sind gegebenenfalls zu prüfen.
