

Sontex is a successful and expanding SME in the field of metrology with headquarters in the Biel region. For 36 years we have been developing, producing and selling devices for the precise metering of energy consumption. We thus support our customers in the efficient use of resources and in saving energy. Our national and international customers are active in the field of building technology and building automation. To strengthen our software team, we are looking for a

DevOps Engineer (m/f 100%)

Your responsibilities

- Operational management and monitoring of the Sonexa Platform
- Deployment and release of new platform versions
- Continuous resource optimization, log analytics, and platform intelligence
- Proactive detection, tracking, and patching of known vulnerabilities
- Incident management and troubleshooting, including 3rd-level support
- Collaboration within a Dev/Sec/Ops organization
- Participation in on-call duty (mainly during release phases or end-of-year periods)
- Independent, responsible work with strong focus on security and reliability

Your Profile

- Bachelor/Master's degree in Computer Science/Engineering or similar know-how.
- Proficient in Linux environments
- Good understanding of Java (ability to analyse stack traces)
- Strong experience with Kubernetes and container-based services
- Experience with GCP is an advantage
- SQL and NoSQL databases
- Understanding of event-driven architectures and message brokers
- Knowledge of OAuth2 and OpenID Connect
- Familiarity with Keycloak for identity and access management
- Proficiency with Git and GitLab pipelines
- Good knowledge of English and French (minimum B2 level). Knowledge of German is an advantage.

What we offer

- A key role in shaping and operating a mission-critical digital platform
- A dynamic, international working environment where English, German, and French are spoken
- Opportunities for professional growth in DevOps, cloud, and cybersecurity
- Flexibility to work with modern tools and contribute proactively to platform evolution
- A collaborative team committed to innovation, responsibility, and quality
